PROFESSIONAL SKILL

- Javascript & PHP
- Web development cycle
- API integration
- UX improvement

TECHNICAL SKILL

- Technical analysis
- Project management
- Time management
- Good Communication Skills
- Adaptability
- Consideration for others
- Flexibility
- Problem Solving Skills

PROFESSIONAL EXPERIENCE

Intern, Back-end Developer   Sept. 2020 – Dec. 2020
Cebu Pacific Air Inc., Philippines

- Developed a web based system, CEB Express Booking Widget, to help client navigate easily to all the available flights with a given time.

Intern, Back-end Developer   June 2020 – August 2020
Raksquad Design and Development

- Developed a web based system, Condo Village Management System, to help condo managers to keep track of certain information about the activities in the condo or the tenants. Managers could store and enter relevant data about the owner and tenants. CVMS also allows managers to keep track of reservations and payments from the tenant/s. It also keeps track of owner account ledgers like record association dues, penalties, water bills, special assessment and owner payments

Banquet Server   September 2022–Present
Carmen's Group

- Deliver and serve food and beverages including, but not limited to, meals, condiments, and accompaniments. Assist others with side work including, but not limited to, clearing glasses and dishware. Communicate any additional meal requirements or special requests to the kitchen. Get to know the guests and be able to comfortably answer any questions a guest may have. Ensure guest satisfaction throughout meal service and event. Learn the details of menu offerings for various events

ACADEMIC PROJECTS

Faculty of Arts and Letters Faculty Records Monitoring System   2019 – 2020
Full Stack Developer – IT Software Engineering Project

- The purpose of the project is to create a system that will store information and records of the Faculty and Administrative body of the Faculty of Arts and Letters. It will be second hand also for monitoring the research and achievements of each professor. Another purpose of the system is to aid the Faculty in their accreditation status based on their research and achievements. The system will be based on the process of a decision support system to further ease the decision making of accreditation of the faculty.

ThomCare: Thomasian's Enrollment Consultation, Concerns, and Services   2020–2021
Back-end Developer - IT Capstone Project

- This study aims to provide a platform that can eliminate the use ofsome unnecessary external platforms when processing documentsand forms within the Institute. The project is intended to give themembers of the Institute of Information and Computing Science(IICS) an access to an application wherein their pre-enrollmentqueries and transactions are tackled and processed and in a moreorganized and more efficient manner. On the same note, the systemcan also be used in limiting the need for onsite interactions thatconsume time and effort of both students and office administratorseven before the COVID-19 pandemic.
